On this role, I've worked on 2 projects:
 1. Telegram-Mini-App, analog of Hamster Combat, with an active audience of more than one million users. In this project, I had to improve performance and implement new features such as daily rewards, crypto payments, a task system, and the integration of SQLAlchemy ORM. Tech stack: Aiogram, SQLAlchemy, FastAPI, PostgreSQL, Docker, Make, Poetry.
 2. Auction. I implemented all the logic and made a lot of integrations. Some of the interesting features: crypto payments, phone/email 2fa, notification system. Tech stack: Django, DRF, Celery, Celery Beat, Socket IO, PostgreSQL, Redis, Make, Docker.
